

NCD Module

argusoft
Quality on Time

Argusoft

- Argusoft is a software services organization based in Gujarat.
- Argusoft has an experience in Digital Health for the over 13 years
- We are empanelled software development agency with the NHA.
- Argusoft has completed over a dozen projects for the WHO.
- We have many LTA with WHO and UNICEF.

Types of NCD screening

1. Hypertension screening

2. Diabetes screening

3. Oral Cancer screening

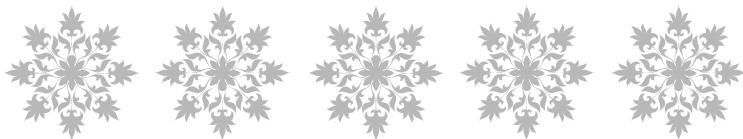

4. Breast Cancer screening

5. Cervical Cancer screening

- *Community Based Assessment Checklist (CBAC)* form is used for the early detection of NCDs.
- ASHA workers play a crucial role in completing the CBAC of all individuals.
- ANM/CHO perform the NCD screening of all individuals

Highlights

- Open source application under the Eclipse v2 Open source license)
- DPG review under way
- Offline Mobile App
- Family folder servers as the basis for all vertical programs
- Integration with the national NP-NCD, RCH Portal, U-WIN, RBSK
- Other integrations in progress - e-Sanjeevini and e-Shusrut
- ABHA Compliant - M1, M2 and M3
- Citizens PHR app also part of Ecosystem
- Proven at scale as CPHC Apps in RCH, RBSK, Nutrition (SAM / MAM), NPCB
- An implementation of this (TeCHO+) has undergone HTA by the Department of Research, Ministry of Health and Family Welfare based on Argusoft's low code, highly configurable MEDPlat platform

Thank You!
